

# ecoraster®

SAVING THE EARTH, ONE GREEN ROOF AT A TIME.

The premier green roofing product across Europe: the German original, ecoraster®.

From small, do-it-yourself conversions of rooftops into traffic-bearing, pedestrian-proof grassed living areas

Compressive Strength: \* 385 to 132 tons / m<sup>2</sup>  
 Vehicular LOAD: 22.45 tons / axle  
 Porosity: \* 82% to 90 % [\*depending upon grade]  
 Patented Horizontal connectors: 1.4 metric tons/m  
 Tensile Strength: 5.6 kilonewtons / meter

**Advantages:**

- » Fast, cost-effective aftermarket conversions.
- » Providing a liveable, pedestrian rooftop area.
- » Supports healthy, verdant growth at any gradient: from flat roof to vertical wall.
- » Stabilizes growth medium, preventing migration.
- » Prevents compaction, or damage to root zones, due to pedestrian or other traffic.
- » Lightweight, durable, stable from -58° to +194° F.
- » German-engineered to support public roadway vehicular traffic; up to 22.45 tons / axle.
